

CONFERENCING

“ We are very happy with our new audio/visual and telephone equipment, and with TelWare advisory and installation. In the past eight years, we have moved our corporate headquarters twice. Each time, TelWare has worked with us closely and managed the installation of new wiring, relocation and/or installation of new telephone, audio/visual and network equipment. Each time they did a first rate job. They have the experience, equipment and people to get the job done on time, and on budget.”

Doug Handy, CFO Sales Performance International

GATHER FOR IMPROMPTU OR SCHEDULED MEETINGS

Collaborate effectively with web, audio and video conferencing on any device. Any space becomes a venue for remote and in-office teams.

SIMPLE AND FLEXIBLE

You can use your OneCloud Unified Communication system to host your own conference bridge. Adding a direct-inward-dial (DID) phone number to your conference bridge allows your attendees to join quickly and easily. Best of all, you can have as many or as few conference participants as desired from any phone anywhere.
