

Are RoboCalls wasting
your company's time &
precious productivity?

*Prevent unwanted calls and
block TDos attacks.*

BLOCK IT FAST

Our customers see immediate results with 99% of spam calls blocked even if spammers are spoofing or changing numbers. It only takes 20 minutes to set up and gain peace of mind knowing that all suspicious calls are rerouted. Works on any phone system, finally putting an end to those annoying phone scammers!

HOW DOES IT WORK?

Our RoboBlock technology verifies phone numbers for legitimacy and searches phone numbers against up-to-the-minute databases to see risk and assigns it a fraud score. Fraudulent calls are routed and blocked from your phone. Suspicious calls are sent to an auto attendant to verify against a human testing validator. No false positives. We manually double check the calls marked a spam.
