

WEB PORTAL

- *Activate users and administrators*
- *Central location at manageable cost*

INNOVATIVE POWER

A powerful web portal for managing voicemail, call history, and more. Have consistency across all devices and optimize workflow communication. While conveniently using the web portal, desktop call controls appear when making or receiving a call. Controls allow you to see who is calling and manage a current call. Make calls from your desktop app by using your computer's mic and speakers. Connect to your phone system and dial calls from your desk.

REACT IN REAL TIME

Web Portal includes a comprehensive set of administrator tools for configuring and managing the system in an easy-to-use admin portal. Keep your customers happier with a complete managing portal for better communication.
