

ONE COMPANY. ONE CALL.

TRANSFORMING THE FUTURE OF BUSINESS

TelWare has helped thousands of customers make the right decisions with technology. With over \$3 billion in sales, we have the experience and vision to navigate changing technology — and the agility for success. One of our greatest values is our commitment to product quality and customer satisfaction. As a leading managed-service provider, we develop partnerships based on collaboration, communication, and results to design solutions that meet the customer's specific needs.

Specializing in multi-site customers, TelWare has solutions for all types of environments, from office to factory, retail to warehouse, school to hospital, and renovations to new construction. Whether you need copper or fiber-optic structured cabling added to an expansion suite, a new VoIP hosted phone system for a growing office, or paging installed in a warehouse, TelWare has you covered with cost-effective solutions.

TelWare can provide support for every step of your IT project, including planning, installation and user training. We can provide local and long-distance voice services and Internet data services. We can assist your IT department with your data network, or become your IT department. TelWare can integrate all forms of communication, including phone, voicemail, email, mobile devices and databases. Now, you can keep in touch with your most important contacts no matter where you are.
