

ONE CLOUD MOBILE

STAY CONNECTED

OneCloud Mobile brings the power of a cloud softphone beyond the simple landline or desktop phone. OneCloud Mobile unlocks user productivity and transforms the future of business communication.

The platform extends traditional VOIP to the way users communicate today between multiple devices with a real-time, asynchronous Unified Communications Solution. OneCloud's complete technology stack maintains the user's identity without interruption regardless of device. Automate communication with manageable contacts, voicemails, call history, answering rules, through a single, intuitive solution.

- *Maintain a Single Identity*
- *Business Phone Features*
