

TELECOM CONSULTING

AND TELECOM EXPENSE MANAGEMENT

Avoid the pain of communicating with multiple vendors trying to win your business. With TelWare, you have a comprehensive overview of pricing to navigate your options to make the best decision for your new service provider. TelWare will benchmark pricing, optimize bandwidth and connectivity specific for your business needs.

Technology changes almost daily in telecommunications, making it difficult to know whether you're always getting the best value for your money. Our technical expertise ensures you'll enjoy the maximum telecom cost reduction—often with improved services or features. We'll make sure you're getting the best combination of telecom consulting services.

Telecom expense management (TEM) can help large businesses maximize existing resources, locate favorable vendor contracts, streamline business processes, and eliminate inefficiencies—with the intention of saving you time and money.

Software alone doesn't do the trick. We can do the following:

- Administer yearly billing reviews
- Conduct account maintenance
- Recommend arrangements for optimization, such as a transition to a different service plan
- Locate savings on your telecom expenditures
- Conduct an audit to pinpoint mistakes and reclaim funds
