- User Portal View
- Group/Queue Voicemail
- Voicemail Transfer

STEP OUT OF LINE

Voicemails can be delivered automatically to your email inbox. The phone system captures your voicemail from the phone system and sends it to you as an audio attachment. You can download or play your voicemail from any device that gets your email. Managing the audio recordings on your devices of choice makes it easy to rewind, fast forward, and control playback of the message. Best of all, this advanced feature comes included, so there is no additional charge.
